Office Action Summary

Application No.

10/051,560

Applicant(s)

SANDERSON ET AL.

Examiner

Kalyan K. Deshpande

Art Unit

3623

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 August 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 17 January 2002 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Introduction

1. The following is a non-final office action in response to the communications received on August 31, 2007. Claims 1-20 are now pending in this application.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 21, 2007 has been entered.

Response to Amendment

3. Examiner acknowledges Applicants' amendment to claim 1, 11, and 18.

Response to Arguments

4. Applicants' arguments submitted on June 21, 2007 have been fully considered but are not found persuasive in part and are moot under new grounds necessitated by amendment in part. Applicants argue i) Seal fails to teach "wherein the work request is unsolicited from the first level, the first level being a decision-making body independent of the Originator", ii) Seal fails to teach "said third level Group Lead reviewing actual work performed by said Facilitators", and iii) "where the unavailable personnel are available at the time of scheduling".

In response to Applicants' argument Seal fails to teach "wherein the work request is unsolicited from the first level, the first level being a decision-making body independent of the Originator", Examiner respectfully disagrees. Seal explicitly teaches "wherein the work request is unsolicited from the first level, the first level being a decision-making body independent of the Originator" (see column 10 lines 16-34 and column 12 lines 10-47; where a work request is created using the job entry application. The request is submitted for review to the contractors for them to bid. Contractors in turn submit bids responses to be awarded the work requests. The work request is submitted by the Originator and work is solicited from the bidders. Thus, the work request is not solicited by the first level.). The recited feature requires that the work request not be solicited from the first level and as is described in Seal, the work request is created by the Originator and unsolicited from the first level.

Applicants' arguments of ii) Seal fails to teach "said third level Group Lead reviewing actual work performed by said Facilitators" and iii) "where the unavailable personnel are available at the time of scheduling" are moot under new grounds of rejection discussed below.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 11, and 18 recite the limitation of "wherein the unavailable personnel are available at the time of scheduling". It is unclear from this limitation how the personnel that are available at the time of scheduling have a status of unavailable. For the purposes of examination, Examiner interprets this limitation to mean available personnel are used for scheduling.

Claims 2-10, 12-17, and 19-20 incorporate the subject matter of claims 1, 11, and 18 and therefore are rejected for the same reasons discussed above.

Claim Rejections - 35 USC § 103

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Seal et al. (U.S. Patent No. 7117162) in view of Miller et al. (U.S. Patent No. 7035809) and in further view of Gullotta et al. (U.S. Patent Publication No. 20020156904).

As per claim 1, Seal teaches:

A method for processing work requests in a system having a central computer containing a web server and a plurality of remote computer workstations coupled to said central computer, said method comprising:

a. an Originator creating a work request at a first of said remote computer terminals and transmitting it to a first level for approval, wherein the work request is unsolicited from the first level, the first level being a decision-making body independent of the Originator (see column 10 lines 16-34 and column 12 lines 10-47; where a work request is created using the job entry application. The request is submitted for review to the contractors for them to bid. Contractors in turn submit bids responses to be awarded the work requests. The work request is submitted by the Originator and work is solicited from the bidders. Thus, the work request is not solicited by the first level.);

b. said first level reviewing said work request and, if approved, transmitting it to a third level Group Lead for work assignment (see column 13 lines 1-10; where contractors submit bids and the bids are reviewed and approved. Once the bid is approved, it is established that the contractor will perform the work requested.);

d. a Facilitator assigned in the preceding step executing said work request (see column 12 lines 47-67 and column 13 lines 1-10; where a facilitator reviews and assigns the bids.);

e. said third level Group Lead reviewing work performed by said Facilitators, and transmitting approval to said fourth level if satisfactory (see column 13 lines 28-44; where the job entry application reviews the entire contract details, including the assignment of bids, and schedules performance of the contract. The review of the contract details is actual work.);

h. closing said work request (see column 11 lines 60-67; where completed tasks and requests are reported and updated in to the master plan. Reporting the tasks as completed is the same as closing the work request.); and

i. an Administrator providing alternate personnel for any unavailable personnel at any one of the first and third levels (see column 14 lines 39-58; where the scheduler administers the scheduling of tasks and provides available personnel to complete the work request.).

Seal fails to explicitly teach “wherein the work request is unsolicited from the first level, the first level being a decision-making body independent of the Originator”, “said third level Group Lead reviewing actual work performed by said Facilitators”, and “where the unavailable personnel are available at the time of scheduling”. Gullotta and Miller, in an analogous art, teach “said third level Group Lead reviewing actual work performed by said Facilitators” (see Miller column 14 lines 20-34; where quality assurance personnel review actual work performed to ensure that it conforms with best practices.) and “where the unavailable personnel are available at the time of scheduling” (see Gullotta paragraphs 124-126; where all available and unavailable resources are maintained a monitored for work request assignment.).

Seal fails to teach “a second level Review Board reviewing said work request”, “a fourth level Review Board reviewing work performed by Facilitator”, and “a fifth level reviewing work performed by Facilitator”. It is old and well-known in the art to have additional personnel (2nd, 4th, and 5th level review) to review service requests to ensure the service request is approvable and classified and routed properly. The advantages

Art Unit: 3623

of having additional personnel review the service request are that the service request is fully considered by more personnel and the service request is properly classified and routed. It would have been obvious, at the time of the invention, for one of ordinary skill in the art to include a second level review board to the Seal system in order to have the service request fully considered by additional personnel and to have the service request more accurately classified and routed.

As per claims 2 and 3, Seal teaches "said work request is disapproved, notifying said Originator by email through said computer system and canceling said work request" (see column 12 lines 10-47 and column 13 lines 1-10; where contractors are notified if their bids are not excepted.) "transmitting said Originator each time said work request is approved" (see column 13 lines 1-10; where the system is updated with the information of who is approved to complete the work.). Seal fails to explicitly teach the notification of approval or disapproval is done via email. It is old and well-known in the art to use email to notify users of an event. The advantage of using email to notify users is that it simplifies the management of a job. It would have been obvious, at the time of the invention, to one of ordinary skill in the art to modify Seal to incorporate the feature of using email to notify users of the approval or disapproval of a request in order to facilitate the management of a job, which is a goal of Seal (see column 1 lines 20-27).

As per claims 4 -6, Seal teaches "providing access to a form for approval of said work request" (see column 12 lines 10-47 and column 13 lines 1-10; where bids are reviewed for comparison and a user is enabled to approve or deny the work request. The providing of a hot link is the same as enabling a user to access the approval form.)

Art Unit: 3623

and “notifying the next level in said process each time said work request is approved” (see column 12 lines 10-47 and column 13 lines 1-45; where users are notified of approval or denial of the work request). Claims 4 and 5 further recite the limitation the “use of email to notify users” which has already been addressed by the rejections of claims 2 and 3; therefore the same rejection applies to these claims.

As per claim 7, Seal teaches:

The method as in Claim 1 wherein said work performed by said Facilitator is not satisfactory, further including the step of notifying said Facilitator and said Group Lead (see column 17 lines 44-67 and column 18 lines 1-19; where the contractors and managers are notified of unsatisfactory work performed.).

As per claim 8, Seal teaches:

The method as in Claim 7 further including said Group Lead and employees reworking said work request until the work is approved (see column 18 lines 9-19; where work that fails inspections can be reworked until it is approved.).

As per claim 9, Seal teaches:

The method as in claim 1 further including a main menu displayed for a user to interactively select a step of said process (see column 11 lines 54-67; where users can enter information at the task level.).

As per claim 10, Seal teaches:

The method as in claim 9 further including displaying on a screen an approval form, wherein the approval form is an acknowledgement of selecting a step of said process from said main menu (see column 18 lines 20-60; where users can select

Art Unit: 3623

tasks and enter information regarding the task. The submitted information is entered in the master plan. The entering of information into the master plan is the same as an approval response to the selection of a step.).

A method for processing work requests in a system having a central computer containing a web server and a plurality of remote computer workstations coupled to said central computer, said method comprising

Claims 11-20 recite limitations already addressed by the rejections of claims 1-10; therefore the same rejections apply to these claims.

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kalyan K. Deshpande whose telephone number is (571)272-5880. The examiner can normally be reached on M-F 8am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tariq Hafiz can be reached on (571) 272-6729. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
